To Whom It May Concern:

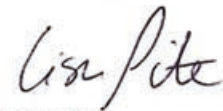

I utilized the services of Esteban Interiors for a complete re-design of my home in 2010-2011. This ranged from the selection of paint colors to the re-design of entire rooms, from bathroom materials selection to interior lighting design plans. Not only do Esteban Lopez and James Niebling have an impeccable sense of design, but it is such a pleasure to work with them. The end result of their work surpassed my expectations, providing my family with a home which has many unique design features.

When I was reviewing portfolios of interior design firms, I looked at Esteban Interiors website and liked their style immediately. For my specific project, they really understood not only the look I wanted to achieve, but they were also able to make their design practical for a family with children.

I had heard "horror" stories about other designers...way off budget, way off timeline, and never available. None of these things happened with Esteban Interiors. They adhered to my budget...whether it was for a specific room or a specific item. Additionally, I had an extremely tight timeline to complete my home - they not only accomplished this, but the outcome was beautiful. Accessibility was never a problem with Esteban and James - they always made time in their schedules for any questions or last minute concerns that arose.

I would highly recommend the services of Esteban Interiors, whether it be for a small or large scale project. Esteban and James are a very talented team, and I feel very fortunate to have benefited from their design expertise.

Sincerely,

Lisa Pite
