PROJECT COASTAL LUXURY

This historically designated home in Windansea Beach served as the perfect canvas for our design team to transform into a modern classic. The brief was to design a home that reflects modern living, with a timeless sensibility, all while combining the client's personal style. Our biggest achievement was to decompartmentalize the home's existing flow, to create a home that fits a more modern lifestyle that connects to the beautiful courtyard and custom pool enclave we designed. The home's history is also echoed with the custom designed mouldings throughout. The added "Casita" or what we labeled as the recreation room features a linear bar, shuffleboard, and ample seating, and provides the perfect counterbalance to the courtyard experience. This added structure also features an independent full bath with bespoke tile and a private office space complete with custom furniture and an independent entrance; both are located in the back of the building.

highlights

- The home's entrance features a bespoke floor design of large geometric marble slabs with inlaid brass
- The newly designed home lives very large and open which lends itself to ample entertaining
- Cleverly designed wine vault
- The kitchen is custom designed and features high-end appliances
- The smart-home lighting, shades and drapery help to balance the lighting while promoting privacy
